ALL NATURAL Fertilizer in a Sprayable Formula

Alaska[®] Sprayable ALL PURPOSE Plant Food 9-4-4

ALL NATURAL Fertilizer in a Sprayable Formula

Alaska[®] Sprayable ALL PURPOSE Plant Food 9-4-4

HOW TO USE OUTDOORS

For best results:

- Using the handy measuring spoon provided, mix 1 tablespoon of ALASKA[®] Sprayable in 1 gallon of water.
- Apply mixture with a watering can or sprinkling can. Thoroughly wet the plant leaves and surrounding soil. Apply as directed every 7 to 14 days.
- Apply during the growing season, to plants that have been well-watered and are not under stress. Use less fertilizer during extremely hot or dry weather.

For FLOWERS, VEGETABLES, FRUITS, ANNUALS, PERENNIALS, BEDDING PLANTS and GROUNDCOVERS of all types, apply one gallon to 10 square feet every 7 to 14 days.

For ROSES and TOMATOES, apply 1/2 to 1 gallon per plant, depending on size, every 7 to 14 days.

For EVERGREENS, TREES, and SHRUBS, apply 1 gallon to 10 sq. feet every two weeks. Be sure to feed the entire root area, which can extend 2-3 times the width of the plant.

For CONTAINER PLANTS, apply up to 1/2 gallon per plant, depending on size, every two weeks.

For TRANSPLANTS of all types, add 1 cup of mixture to each planting hole to help prevent transplant shock.

For LAWNS, apply 1 gallon to 25 square feet every 7 to 14 days, as a supplement to regular lawn fertilization.

HOW TO USE INDOORS

For HOUSEPLANTS, mix 1/2 - 1 teaspoon in 1 gallon of water, using the handy measuring spoon provided. Apply to the soil every two weeks. Foliar feeding of houseplants is not recommended. If weekly feeding is desired, use just 1/4 teaspoon in 1 gallon of water.

HOW TO APPLY WITH ANY CLOG-FREE HOSE-END FEEDER

For use in feeders without siphon tubes

Use this amount of ALASKA [®] Sprayable	To cover this amount of area
1/4 cup (4 tablespoons)	125 sq ft (5' x 25')
1/2 cup (8 tablespoons)	250 sq ft (10' x 25')

Using the handy measuring spoon provided, add a measured amount of plant food to the feeder jar. Attach the clog-free spray head and hose. Turn on the water. While gently shaking the feeder, allow jar to fill with water. Spray back and forth quickly over foliage and soil, dispensing plant food evenly until the water in the jar is almost clear. To avoid clogging, do not turn feeder upside down while spraying. Rinse feeder thoroughly with clear water after application.

Clog-free hose-end feeders first spray a concentrated mixture of plant food and water that becomes more diluted as the mixture is dispensed. To ensure even feeding, spray back and forth several times over the area.

ALASKA[®] Sprayable ALL PURPOSE Plant Food is made with Fish—The Original New World Fertilizer[™], plus natural bone and blood meals, sulfate of potash, and non-staining iron from ferrous carbonate. It is the all natural alternative to commonly used synthetic soluble fertilizers.

The all natural plant foods in ALASKA[®] Sprayable are ground to a fine powder that is easily mixed with water and then conveniently applied using a watering can, sprinkling can, or any clog-free hose-end feeder.

ALASKA[®] Sprayable is safe for people, plants, and the environment, and will not burn plants when used as directed, even in warm weather. Unlike many synthetic soluble fertilizers, ALASKA[®] Sprayable does not contain added colors, and its non-staining iron turns plants a vibrant green without staining concrete, wood, or fabrics.

The high chloride content of many synthetic soluble fertilizers contributes to late season salt buildup in treated soils, especially after repeated use. This salt buildup is toxic to plant roots, and can result in sickly, spindly plants that fail to thrive. ALASKA[®] Sprayable is low in chlorides. Repeated applications, even weekly, will not contribute to late-season salt buildup. Your plants will remain vigorous and lush for the entire growing season.

Use ALASKA[®] Sprayable ALL PURPOSE Plant Food throughout your yard and garden for armloads of colorful and fragrant flowers, bushels of flavorful and abundant crops, and lush ornamental plants and lawns with vibrant green foliage.

Alaska[®] Sprayable ALL PURPOSE Plant Food

- Made with fish and other natural ingredients
- Apply with a watering can or any clog-free feeder
- Use on flowers, roses, vegetables, evergreens, shrubs, trees, lawns, and houseplants
