

Lilly Miller

VITA BLOOM

BLOOM FERTILIZER

Brighter roses, mounds of hydrangeas, waves of chrysanthemums, more marigolds, and prettier petunias — all your flowering plants will make bigger and more colorful blooms with Lilly Miller Vita Bloom. It's the easy way to give your flower garden the extra phosphorus and potassium it needs to bloom all summer long.

Lilly Miller blends traditional plant food ingredients for this special mix. Some go to work fast, to get plants off to a great start. Some last longer, to keep on feeding steadily in your garden for weeks. Vita Bloom also adds important minerals — iron, zinc, sulfur, manganese and more, to enhance flower color and plant vigor.

Use Lilly Miller Vita Bloom when you first see buds and continue monthly throughout the summer.

PLANTING INSTRUCTIONS

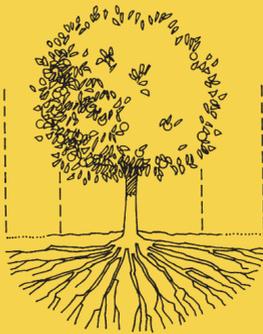

For annual bedding plants, perennial flowers and bulbs: Use 1 cup Vita Bloom for each 25 sq. ft. (5' x 5') of flowerbed. Sprinkle the granules evenly over the area. Scratch them lightly into the soil, where possible. Water the area well to wash any granules off the leaves and to start the plant food working.

For flowers and bulbs in rows: Sprinkle 1/3 cup Vita Bloom alongside every 10 feet of row. Keep the fertilizer at least 3 inches away from the plants and mix it lightly into surface of the soil. Do not disturb plant roots or injure shallow bulbs.

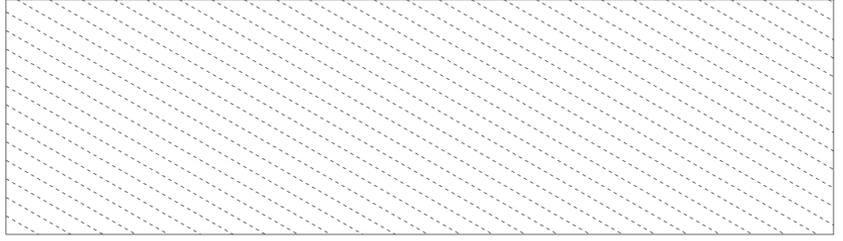

For roses and other summer-blooming shrubs: Use 2 tablespoons of Vita Bloom for each one, and 1/4 cup for plants over 6 feet tall.

Sprinkle the granules in a ring around the base of the bush, 6-12 inches away from the center of the plant, or at the dripline for plants over 6 feet tall. Scratch the granules in lightly, but do not disturb plant roots.

Always water the plants and soil well, after adding fertilizer. Apply up to 3 times per year.

OUR COMMITMENT TO YOUR SATISFACTION: If you are not happy with the way this product works in your garden, please let us know. We will be happy to replace the product, refund your money, or substitute another Lilly Miller product. Simply send your name, address and proof of purchase to the address shown.

GUARANTEED FERTILIZER ANALYSIS (F1476)

Available Phosphate (P ₂ O ₅).....	10%
Soluble Potash (K ₂ O).....	10%
Calcium (Ca).....	4%
Sulfur (S).....	2%
Boron (B).....	0.02%
Iron (Fe).....	0.10%
Manganese (Mn).....	0.05%
Molybdenum (Mo).....	0.0005%
Zinc (Zn).....	0.05%

Derived from Superphosphates; Sulfate of Potash; Calcium and Sodium Borate; Ferrous, Manganese, and Zinc Oxides; Sodium Molybdate.

ABOUT OUR SPECIAL FORMULA...

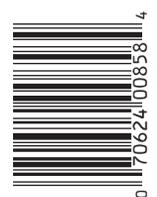

0% N Nitrogen
We do not use nitrogen in Vita Bloom. Extra nitrogen at bloom time will encourage plants to produce leaves instead of flower buds.

10% P₂O₅ Available Phosphate
We add extra Phosphorus because it is the key to abundant and brighter flowers.

10% K₂O Soluble Potash
Potassium (potash) helps build up the plant's resistance to disease, insects and drought.

Filled by weight not by volume. Product may settle after packaging.
