HOW TO PLANT A NEW LAWN

- Measure your new lawn area. This package contains enough seed to plant 2,000 sq. ft. of new lawn. Make sure you have enough materials such as Lilly Miller® Seed & Sod Starter fertilizer and mulch to complete the job.
- Remove any debris that may be present in the planting area. Using a rototiller, cultivate the soil to a depth of 4 to 6 inches. The soil should be free of clods and loose when properly prepared.
- Remove any rocks that may have surfaced.
- Grade the seed bed to eliminate any low or high spots.
- Apply a starter fertilizer like Lilly Miller® Seed & Sod Starter following package directions.
- Use a lawn spreader to sow seed uniformly over the area. Be sure to overlap rows to cover wheel tracks.
- Rake seeds lightly into the top 1/8 inch of soil.
- Cover with a thin layer of mulch or peat moss and roll to firm seeds into the soil.
- Water the lawn area often, but not to the point of run-off or puddling.

ALERT!! Grass seed requires moisture to germinate. Allowing the lawn area to dry out, even for a short time, will kill many seeds.

GUARANTEED TO GROW A BEAUTIFUL GREEN LAWN

If the grass seed in this bag fails to grow a beautiful green lawn, please let us know. Simply send your name, address, and proof of purchase to the address shown, and we will refund your purchase price.

NET WT. 10 lb. (4.5 kg)

Pacific Northwest
Premium Grass Seed Mixture

ULTRARICH
Pacific Northwest
Premium Grass Seed Mixture

Lilly Miller® Ultrarich™ Pacific Northwest Grass Seed Mixture provides a mix of seed varieties ideally suited to conditions in the Pacific Northwest. This balanced seed mix will grow a lush green lawn that is beautiful and easy to care for but also strong and able to fight off disease and weed attacks. Under normal conditions Ultrarich™ Pacific Northwest Grass Seed Mixture will germinate in 7-10 days. Start mowing grass when it is 3 inches tall. Ultrarich™ Pacific Northwest Grass Seed Mixture looks best when mowed to 2-1/2 to 3 inches tall.
