## Bone Meal

Lilly Miller BONE MEAL is the easy, natural way to add phosphorus whenever your garden plants need it. It's the traditional plant food used when planting tulips, daffodils, freesia, crocus, anemones, gladiolus, and all your other bulbs. Use it anywhere plants need phosphorus for strong roots, abundant fruit, and colorful flowers.

Lilly Miller Bone Meal is a high grade, all organic plant food that is particularly rich in phosphorus and calcium. Because it is not highly processed, Lilly Miller Bone Meal retains much of its original nitrogen, for added plant nutrition.

### HOW DO I USE THIS PRODUCT?

**When planting a whole bed or border of bulbs:** Sprinkle 2 cups of Lilly Miller Bone Meal evenly over each 20 sq. ft. of garden area (5' x 4'). Mix it into the soil to a depth of 3 - 6 inches, along with any compost or other soil amendments you are adding.

Planting depth varies widely, depending on the type of bulb. Check bulb packet or with local nursery, for correct planting directions for the bulbs you chose.

#### BULB PLANTING CHART

1	Anemone							
	Freesia	Sparaxis	Ranunculus	Crocus				
3			Gladiolus	Narcissus				
5	Tulip		Hyacinth	Bulbous Iris				
7			Daffodil					

**For a bulb bed or border:** Use 1-1/4 cup Lilly Miller Bone Meal for every 12 sq. ft. (3' x 4') of garden bed. Sprinkle it around bulbs. Keep fertilizer off leaves. Mix it lightly into surface of the soil, but do not disturb plant roots.

For extra nutrients and to keep your bulbs blooming year after year, use Lilly Miller Bulb & Bloom Food, at one half the suggested rate, along with Bone Meal.

**For individual bulbs:** Sprinkle 1 tbsp. of Lilly Miller Bone Meal in a circle around the plant. Keep plant food away from the leaves or stems. Mix it lightly into surface of the soil, but do not disturb plant roots.

After bulbs are finished flowering, allow leaves to die down naturally. They are storing up food for next year's flowers. After six weeks, leaves can be cut off.

Always water planting beds well after adding fertilizer.

**OUR COMMITMENT TO YOUR SATISFACTION:** If you are not happy with the way this product works in your garden, please let us know. We will be happy to replace the product, refund your money, or substitute another Lilly Miller product. Simply send your name, address and proof of purchase to the address shown.

ABOUT OUR SPECIAL FORMULA...

6% N Nitrogen

The bone meal we use is naturally rich in nitrogen, and will encourage lush green growth.

12% P<sub>2</sub>O<sub>5</sub> Available Phosphate

Phosphorus is the key that gives your bulbs more and brighter flowers.

0% K<sub>2</sub>O Soluble Potash

There is no potassium (potash) naturally in bone meal. If your garden needs potassium, try Lilly Miller Bulb & Bloom Food.

Bone Meal is also rich in calcium.

PROTECT YOURSELF, PROTECT YOUR PETS
