

SPOONIT®
6-30-30
BLOOMIT

**Dormant Season
ORCHID FOOD**

FOR ALL ACID LOVING PLANTS

NET WT. 6 OZ. (170 g)

SPOONIT®

SPOONIT® BLOOMIT is a concentrated, water soluble, low nitrogen plant food formulated especially for the feeding of Orchids. Use during the dormant season (generally November through January) to promote larger, more beautiful blooms on Orchids and all acid-loving plants: Fuchsias, Begonias, African Violets, Camellias, Azaleas, Roses, Berries, Melons, Fruit Trees, and Vegetables.

DO NOT APPLY IN DRY FORM. Dissolve one level teaspoon of SPOONIT® BLOOMIT in one gallon of water.

FOR ORCHIDS, approximately two months before the blooming season, saturate bark or other potting media with SPOONIT® BLOOMIT solution every 10 days or two weeks. This will help initiate "flower spike" development. SPOONIT® BLOOMIT may be used until the flowering season is over. Always pre-water the day before feeding if bark or soil is dry. During the growing season (generally February through October), feed with high nitrogen SPOONIT® 30-10-10 ORCHID FOOD.

FOR ACID-LOVING PLANTS, start feeding SPOONIT® BLOOMIT in early fall and continue until plants are finished blooming.

GUARANTEED ANALYSIS (F1475):

Total Nitrogen (N).....	6%
6.0% Ammoniacal Nitrogen	
Available Phosphate (P ₂ O ₅).....	30%
Soluble Potash (K ₂ O).....	30%

Derived from ammonium sulfate, ammonium phosphate, muriate of potash.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.regulatory-info-lmb.com>.

Filled by weight not by volume. Product may settle after packaging. Keep out of reach of children. Store in a dry location. Keep lid securely fastened. Hardening may occur due to exposure to moisture. Break up clumps before use.
